Summary

Ambitious **Full-Stack Web Developer** and Computer Science graduate (2025) with a proven record of academic excellence (**Excellent with Honors**). Currently a fellow in the **ITI 9-Month Program (Open Source Track)**, building robust web architectures. Passionate about writing clean, scalable code and bridging the gap between frontend user experience and backend logic. Ready to bring fresh technical perspectives to professional software development projects.

Education

2025 – Present	9-Month Professional Training Program, Information Technology Institute (ITI) Track(Open Source Applications Development),Branch (Zagazig) - Practical training focusing on advanced web architectures, open-source technologies, building robust backend APIs, and modern frontend frameworks.
2021 – 2025	Bachelor of Computer Science Faculty of Computers and Information, Computer Science Department, Zagazig University Grade: Excellent with Honors Graduation Project: Mobeen (Mobile Application) Grade: Excellent. Project Description: A specialized mobile application designed to simulate and facilitate speech therapy exercises, helping users improve their communication and speech skills through interactive digital tools. - Worked on data collection and preparation for machine learning models, and contributed to the machine learning pipeline integration within the application. Project Repo: https://github.com/hagernofal/Mobeen-Application.git 

Technical Skills

Frontend Development	Backend Development	Database	CMS and ERP
Frameworks: - Angular - React.js - Next.js - Vue.js Core and Styling: - HTML5 - CSS3 - Tailwind CSS - Bootstrap Cloud and DevOps - Cloud Computing Basics - Docker	Frameworks: - Laravel (PHP) - NestJS (TypeScript) - Express.js (Node.js) - Django (Python) - Ruby on Rails (Ruby) Testing - Unit Testing	- MySQL - MongoDB - Relational & Non-Relational Database Design Tools and Methodologies - Git - GitHub - VS Code - Agile/Scrum Development	- WordPress - Open Source ERP Systems (Odoo)

Projects

Aian – ITI Graduation Project, *(Currently in Development)*

- Aian is an AI-powered organizational memory platform that transforms everyday team activity into a searchable, intelligent knowledge system
- **Repo:** <https://github.com/hagernofal/Aian.git> 

Elevate

- Academic Mentorship and Code Review Platform designed to streamline engineering mentorship and evaluation workflows. The system allows junior developers (Students) to browse technical experts, view real-time availability, and book 45-minute technical sessions (code reviews, pair programming, and mock interviews), while allowing Mentors to manage slots and Admin to oversee configurations. Built with **NestJS RESTful API** backend and **React.js** frontend.
- **Repo:** <https://github.com/hagernofal/Elevate.git> 

IRB Digital System (Refactored to Laravel & Vue.js)

- An institutional platform designed to digitally manage and streamline the research application lifecycle for **Medical School students**, covering everything from initial protocol submission to multi-stage academic reviews and final approvals. Originally built with native **PHP**, the system was modernized into a decoupled Full-Stack architecture using a **Laravel RESTful API** backend and a reactive **Vue.js** frontend.
- **Backend Repo:** https://github.com/hagernofal/iti_irb_backend_laravel.git 
- **Frontend Repo:** https://github.com/hagernofal/iti_irb_frontend_vue.git 

IRB Digital System

- Built a research workflow system using **PHP, MySQL, Vanilla JavaScript, and CSS3** with Role-Based Access Control (RBAC) to manage user permissions and track document versions.
- **Repo:** <https://github.com/hagernofal/irb-digital-system.git> 

CareLink

- Built a clinic system with a secure **Django** backend for patient records and an **Angular** dashboard for doctors to manage appointments in real-time.
- **Backend Repo:** <https://github.com/hagernofal/CareLink.git> 
- **Frontend Repo:** https://github.com/hagernofal/CareLink_Front.git 

ShopIQ - E-Commerce Platform

- Developed an e-commerce platform using the **MEAN Stack (MongoDB, Express, Angular, Node.js)** featuring advanced product filtering and soft-delete database logic.
- **Backend Repo:** https://github.com/hagernofal/ITI_ECommerce_Back-Node-.git 
- **Frontend Repo:** <https://github.com/hagernofal/shopiq-frontend.git> 

Languages

- Arabic (Native)
- English (Upper-Intermediate)

Extracurricular Activities

2023 – 2024

Competitive Programmer at ICPC Zagazig Community

- Competed in the official ICPC regional/national contests for two consecutive years, solving complex algorithmic problems, managing data structures, and collaborating with a team under intense time constraints.

2022 – 2024

Technical Instructor & Media Lead at ICPC Zagazig Community

- Acted as a technical instructor, mentoring and teaching programming fundamentals to "Level 0" students.
- Led the media committee to manage community presence and events.
